Baby Health Apps

Web Md Baby

Provides you with an extensive library of medically approved content to help you keep your baby healthy, happy and adorable as ever. (Free:iPhone and Android)

- [Download WebMD Baby](#)

First Year

Set reminders and input data with a few finger taps. Keep notes on doctor visits. (Free: iPhone)

- [Download FirstYear on iTunes](#)

Infant Risk Center

Search the Texas Tech University Health Science Center drug database for medications by name or by category. Includes information on more than 20,000 prescription and non-prescription drugs. (\$9.99: iPhone and Android)

- [Download InfantRisk Center on iTunes](#)
- [Download InfantRisk Center on Google Play](#)

Eat Sleep

Want to track your baby's routine throughout the day? This way you can evaluate daily, weekly or monthly trends to make there are not any potential health issues. (Free: iPhone)

- [Download Eat Sleep on iTunes](#)

Baby Sprout

Record immunizations and growth and monitor medications. (Free; iPhone)

- [Download Baby Sprout on iTunes](#)

Baby Food Allergy Tracker

Once your baby is old enough to eat solid foods, it will be important to track any unusual changes or reactions as possible signs of food allergies. The tracker app allows you to make a list of foods your baby still needs to try, keeps notes on foods he/she has tried and records any suspected reactions you think they had. (\$0.99; iPhone)
